Immediate Release

Racking up the Products

PAJA Automotive have just concluded a complete overhaul of it's Rack End and Steering Rack Boot programmes.

Featuring over 120 new part numbers, the O.E.M. Products steering and suspension range now includes the largest range of quality **Rack Ends** available from any one supplier in Australia.

Including over 80 part numbers and featuring over 1400 specific vehicle fitment applications the O.E.M. Products **Steering Rack Boot** range is currently one of the most extensive available.

Both of these ranges incorporate early to late model vehicle listings including Australian, Japanese, European and American vehicle applications.

Marketed under the quality O.E.M. Products brand, all product is packaged in the aesthetically pleasing O.E.M. Products boxing and provides for excellent point of sale value.

PAJA's newly developed Rack End and Rack Boot catalogue has eliminated the need to use two catalogues when identifying required applications for these groups. A new Application Guide has been developed, listing Rack Ends and Rack Boots conveniently on the same page for the same application.

For your copies of the new Rack End and Steering Rack Boot Application Guide please contact PAJA Automotive on 1300 55 90 86 or fax your request to FREE FAX 1-800 2 4 6 8 10 or email to sales@oem-products.com
